

Cabinets will have white, woodgrain, or plywood interiors. When a finished end is specified, the interior will remain white or woodgrain. Please note that when the Walloon door is chosen, DP will be required for finished ends. Remember to deduct cabinet width by  $\frac{3}{4}$ " per finished end when DP is used.

Finished ends are HPL or TFL as well as panels and toe kicks.

Exteriors of wall cabinet bottoms will have a matching exterior species and color relative to the door.

All edgebanding is color-matched PVC.

Finished ends must be specified at the time of order.

Cabinet toe kicks are a matching material to the cabinet interior. To finish the kick, a TK or UTK must be ordered and will be installed by dealer.

Size reduction is free of charge and must be specified at time of order. Sizing is customizable to  $\frac{1}{8}$ ". Example: If a  $13 \frac{1}{4}$ " wide base cabinet is needed, a B15 must be ordered and the reduced width must be noted.

Legend for using the catalog:

<b>Abbreviation</b>	<b>Meaning</b>
